

BACKGROUND

Over the past six months we have received a sizable increase in requests related to solar energy. We realized we should provide more information to our members that will help them evaluate solar technology and providers. Therefore, we have spent the past six months working to develop a solar vendor program that is simple, yet valuable.

We are delighted to announce that we are ready to officially launch this great new program.

WHAT THIS MEANS TO YOU

- If you are considering leasing or owning a solar energy system, you will now have information about financing and leasing arrangements and the opportunity to evaluate proposals from credible solar vendors specializing in the agricultural sector.

HOW THE PROGRAM WORKS

- We have partnered with two recognized entities that have a solar vendor vetting process in place, ensuring that you are only put in contact with credible solar vendors.
- As the primary point of contact, Western Growers' Science and Technology Department will address individual requests and refer interested members to the right parties.
- We will also provide periodic updates with the latest news in the solar industry.

If interested in receiving these updates, email ssalas@wga.com to join our mailing list.

THE PROCESS

STEP 1

Interested members contact our Science & Technology Department for additional information.

STEP 2

Member requests are addressed by parties participating in this initiative.

STEP 3

Western Growers' Science & Technology Department evaluates the program based on how each request is successfully addressed.

Western Growers is not affiliated with, does not endorse and does not require the use of any particular financial institution or solar provider. Western Growers is not responsible for the quality, defects, performance and delivery of goods and services in connection with solar energy systems procured through the WG Solar Energy Initiative. It is Western Growers' intent to provide reliable information and access to qualified financial institutions and solar vendors; however, Western Growers' members are solely responsible for selecting their financial institution or solar provider.
