Need Help with Affordable Care Act IRS reporting?

We work with employers to help them prepare for the next tax season.

The ACA Dashboard

There is a costly compliance risk with not reporting or not reportely accurately. Affordable Care Act (ACA) reporting for the Internal Revenue Service (IRS) is complicated. To avoid fines, every employer with 50 or more full-time employees (including full-time equivalents) must report at tax time its employee information based upon activities of the previous year. We can help! Pinnacle Claims Management, Inc. (PCMI) has leveraged its technology capabilities and expertise with the ACA to offer ACA IRS reporting through the Pinnacle ACA Dashboard (the "Dashboard"). The Dashboard contains an ACA Reporting Essentials module that is a cloud-based solution designed to aggregate employer plan and coverage information to populate the IRS forms 1094-C and 1095-C forms.

The ACA Reporting Essentials:

- Consolidates information related to offers of coverage, employee count and other data for IRS reporting
- Allows you to upload eligibility records directly into the software
- Documents different types of coverage you offer
- Generates the associated reporting codes based upon your health plan information
- Populates the 1094-C and 1095-C forms
- Includes a fee-based Print and Mail service to distribute employee statements
- Includes E-filing service!

In-house solutions and typical payroll or benefit administration reporting cannot fully address the evolving complexity of the ACA. We utilize employer-specific data to help you streamline IRS reporting and generate employee statements.
